📍 Coimbatore, India

PROFESSIONAL SUMMARY

B.E. in Computer Science Engineering, graduate (2026), with hands-on experience in software development, full stack development, AI applications, and backend development. Developed multiple end-to-end projects utilizing Java, Spring Boot, Python, REST APIs, LangChain, CrewAI, RAG, MySQL, and vector databases. Possesses strong knowledge in objectoriented programming, database management, API integration, and scalable application development. Passionate about delivering production-ready software solutions and seeking entry-level roles as a **Software developer**, **Java developer**, **full stack developer**, or **AI engineer**.

SKILLS

Programming Languages :	Python, Java
Databases :	MySQL
AI/ML :	Machine Learning, Retrieval-Augmented Generation (RAG), AI Agents (CrewAI), LangChain, Vector Databases, LLM Integration, LangGraph
Frameworks & Libraries :	Spring Boot, REST API
Tools & Platforms :	Git, GitHub, Serper API, Web Scraping, Maven, VS Code, IntelliJ IDEA, Eclipse, Jenkins, Docker
Web Development: :	HTML, CSS, JavaScript
Soft Skills :	Prompt Engineering, Quick Learning Ability, Problem Solving, Analytical Thinking
Languages :	English, Tamil

WORK EXPERIENCES

Java Full Stack Developer Intern Internship	Mar 2025 - Apr 2025
<i>ZIDIO Development</i>	<i>Remote</i>
• Architected and delivered an Expense Manager Application using Java and Spring Boot, implementing layered REST APIs, business logic, and full CRUD operations against a MySQL backend. • Engineered real-time input validation and seamless frontend-backend integration (HTML/CSS), reducing user error rates and improving overall application responsiveness. • Applied RESTful design principles and MVC architecture to build maintainable, production-quality code within a 1-month delivery cycle.	
Technologies / Skills Used : Java, Spring Boot, MySQL, HTML, CSS	

PROJECTS

Embedded Systems QA Assistant (RAG-based)  Github
<i>Developer</i>
• Architected a free, open-source academic QA system using Retrieval-Augmented Generation (RAG), supporting multi-format ingestion — PDFs, Word, Excel, CSV, and YouTube transcripts — for broad knowledge coverage. • Implemented document chunking, embedding pipelines, and a vector database for fast semantic retrieval; applied prompt engineering with LLMs to generate context-aware, accurate answers across complex technical domains. • Built a Python-based conversational interface with persistent memory, enabling multi-turn, context-aware interactions — improving response relevance and user experience across extended Q&A sessions.
Technologies / Tools Used : RAG, LangChain, Vector DB, Python, LLM
AI Resume Analyzer & Job Preparation System  Github
<i>Developer</i>
• Built a multi-agent AI pipeline using CrewAI to automate end-to-end job preparation — orchestrating role-based agents for resume tailoring, JD analysis, and interview question generation aligned to target roles. • Integrated web scraping and Serper API for real-time job data retrieval, enabling agents to generate contextually accurate, job-specific resume content and interview strategy without manual input. • Implemented task decomposition and agent collaboration patterns, producing a reusable agentic framework applicable across multiple job domains and industries.
Technologies / Tools Used : CrewAI, Serper API, Python

PROJECTS

Online Examination System with Auto-Evaluation | Github

Developer

- Designed and deployed a cloud-ready online examination platform with secure user authentication, exam lifecycle management, and real-time result generation using **Java**, **Spring Boot**, **HTML**, **CSS**, and **JavaScript**.
- Engineered an NLP-based auto-evaluation engine leveraging TF-IDF and Cosine Similarity to assess descriptive answers by semantic similarity and keyword matching — improving evaluation accuracy and consistency while eliminating manual grading effort.
- Developed the system for institutional scale (schools, colleges, e-learning platforms), enabling concurrent exam sessions with automated scoring and instant result delivery.

Technologies / Tools Used : Java, Spring Boot, HTML, CSS, JavaScript, NLP, MySQL

Online Task Tracker | Github

Developer

- Developed a web-based task management system with secure authentication and a dynamic dashboard supporting full task CRUD operations (add, edit, delete, view) with deadline and priority tracking.
- Built backend using **Java** HTTP Server and **JDBC** with **MySQL**, ensuring reliable data operations and efficient query handling.

Technologies / Tools Used : Java, JDBC, MySQL, HTML, CSS

EDUCATIONS

VSB College of Engineering Technical Campus | Coimbatore, Tamil Nadu

2022 - 2026
CGPA : 7.9 / 10

B.E. Computer Science and Engineering

- CGPA: **7.9 / 10**

Devi Matriculation Higher Secondary School | Mannargudi, Tamil Nadu

2021 - 2022
CGPA : 74.6/100

HSC (Higher Secondary Certificate)

- Percentage: **74.6/100**

Devi Matriculation Higher Secondary School | Mannargudi, Tamil Nadu

2019 - 2020
CGPA : 76.8/100

SSLC (Secondary School Leaving Certificate)

- Percentage: **76.8/100**

CERTIFICATIONS

- IBM RAG and Agentic AI – [Coursera \(IBM\)](#)
- Amazon Junior Software Developer – [Coursera \(Amazon\)](#)
- Building AI Agents and Agentic Workflows – [Coursera \(IBM\)](#)
- Google AI Essentials – [Coursera \(Google\)](#)
- Google Prompting Essentials – [Coursera \(Google\)](#)
